

CONTENTS

INVITED PAPERS

Market acceptance of self-compacting concrete, the Swedish experience <i>Åke Skarendahl</i>	1
State of the art on self compacting concrete in the Netherlands <i>Joost C. Walraven</i>	13
The applications of SCC in Taiwan <i>Yin-Wen Chan and Jenn-Chuan Chern</i>	25
Service life evaluation and durability design system for self compacting concrete <i>Koichi Maekawa and Tetsuya Ishida</i>	33

KEYNOTE PAPERS

Utilization of new concrete technology in construction projects -future prospects of self-compacting high performance concrete <i>Kazumasa Ozawa</i>	57
Current condition of self-compacting concrete in Japan <i>Masahiro Ouchi</i>	63

Self-Compactability of Fresh Concrete

Investigation on shear flow of self-compacting concrete <i>Zhuguo Li</i>	69
Simulation of self-compacting concrete -laboratory experiments and numerical modelling of slump flow and L-box tests <i>Örjan Petersson and Hossein Hakami</i>	79
Assessment of thixotropic behavior of self compacting microconcrete <i>Fabrice Toussaint, Cédric Juge, Jean Michel Laye and Bruno Pellerin</i>	89

Thixotropy of self-compacting concrete <i>Peter Billberg and Thomas Österberg</i>	99
Development of the settlement column segregation test for fresh self-compacting concrete (SCC) <i>Mark J. Rooney and Peter J. M. Bartos</i>	109
Deformability and compressive strength models for self-compacting concrete <i>Somnuk Tangtermsirikul, Jittbodee Khunthongkeaw and Theerasak Kaewkhluab</i>	117
Rheological study on the workability of fibre-reinforced mortar <i>Steffen Grünewald and Joost C. Walraven</i>	127
Maximum content of steel fibres in self-compacting concrete <i>Steffen Grünewald and Joost C. Walraven</i>	137
Constitutive rheological design for development of self-compacting engineered cementitious composites <i>Victor C. Li, Hyun-Joon Kong and Stacy G. Bike</i>	147

Chemical Admixtures

Improvement of the compatibility between cement and superplasticizer by optimizing the chemical structure of the polycarboxylate-type superplasticizer <i>Kazuo Yamada, Shoichi Ogawa and Tomoo Takahashi</i>	159
The mechanism of time dependence for fluidity of high belite cement mortar containing polycarboxylate-based superplasticizer <i>Akira Ohno, Yoshinobu Edamatsu, Takumi Sugamata and Masahiro Ouchi</i>	169
Development of a liquid type admixture for self-compacting concrete <i>Hotaka Yamamuro, Daisuke Hamada and Masafumi Shonaka</i>	179
Blends of polycarboxylate-type superplasticizers in use for concrete admixtures <i>Ulf Velten, I. Schober, U. Sulser and U. Mäder</i>	187

New generation of a superplasticizer with synergetic effect <i>Dubravka Bjegovic, Boris Miksic and Stella Matuzic</i>	195
The adsorption isotherms of sulfonated naphthalene formaldehyde (SNF) on portland cement hydration products and its effect on the hydration kinetics of clinker minerals at high dosages <i>J.B.Kazirukanyo and N. Tenoutasse</i>	203
Distinction between particle-dispersion and particle-repulsion effects of superplasticizers on the viscosity of fresh mortar <i>Takumi Sugamata, Yoshinobu Edamatsu and Masahiro Ouchi</i>	213
A study on the basic properties of a self-compacting concrete containing the γ -polyglutamic acid-type segregation inhibitor <i>Manabu Kanematsu, Takafumi Noguchi, Mamoru Kikuchi, Yoshiro Ogawa, Ryota Kanegae and Fuminori Tomosawa</i>	221
Evaluation of S-657 biopolymer as a new viscosity-modifying admixture for self-compacting concrete <i>Noboru Sakata, Shuji Yanai, Masato Yoshizaki, Alain Phyfferoen and Henri Monty</i>	229

Characterization of Material & Mix-Proportioning

Application of "The Water Layer Model" to self-compacting mortar with different size distribution of fine aggregate <i>Takehiko Midorikawa, Galia I. Pelova and Joost C. Walraven</i>	237
Particle-matrix model based design of self-compacting concrete with lignosulfonate water reducer <i>Kåre Reknes</i>	247
Characterisation of fillers for SCC <i>Bård Pedersen and Ernst Mørtzell</i>	257
The particle matrix model applied on SCC <i>Sverre Smeplass and Ernst Mørtzell</i>	267

Limestone powder as filler in self-compacting concrete -frost resistance and compressive strength <i>Örjan Petersson</i>	277
Influence of filler characteristics on SCC rheology and early hydration <i>Peter Billberg</i>	285
Optimization of self-compacting concrete mixes <i>Iris Marquardt, Jan Vala and Ulrich Diederichs</i>	295
Low grade SCC with secondary natural sand rich in fines <i>Kåre Johansen and Lars Busterud</i>	303
Self compacting concrete in Argentina: the first experience <i>Gastón Fornasier, Carlos Fava and Leonardo Zitzer</i>	309
Consideration on filling characteristics of SCC based on fluidity of cement paste component <i>Satoshi Sasaki and Makoto Kagaya</i>	319
Optimization of cost-effective self-consolidating concrete <i>Aicha Ghezal and Kamal H. Khayat</i>	329
A low cost self-compacting concrete <i>A. Bettencourt Ribeiro and Arlindo Gonçalves</i>	339
Examinations for the production of self-compacting concrete using lignite fly ashes <i>Gert Köning, Frank Dehn, Jianxin Ma and Jörg Dietz</i>	349
Applications of ready-made binders for self-compacting concrete (SCC) <i>Gert Köning, Frank Dehn, Frank Weise and Claudia Hertel</i>	361
A new concept for improved rheological stability to allow reduction in cement content of self compacting concrete <i>Ulf Skarp, Jens Engstrand, Inger Jansson, Carl H. Bigley, Mohammed Omari and Annika Wirje</i>	369
Experimental optimization of high-strength self-compacting concrete <i>Paulo C. C. Gomes, Ravindra Gettu, Luis Agulló and Camilo Bernad</i>	377

Sand-rich self-compacting concrete <i>Annette Spengler and Peter Schiessl</i>	387
Laboratory tests on SCC with Portuguese materials <i>Sandra B. Nunes, Joanna S. Coutinho, Joaquim Sampaio and Joaquim A. Figueiras</i>	393
Development of high volume coarse aggregate self-compacting concrete <i>Joseph A. Daczko and Mark A. Kurtz</i>	403
Development of Self-Compacting Lightweight Aggregate Concrete <i>Harald S. Müller, Viktor Mechtcherine and Michael Haist</i>	737

Early Age & Durability

Early-age creep and shrinkage in self-compacting concrete Incorporating GGBFS <i>Ha-Won Song, Keun-Joo Byun, Sung-Hun Kim and Duck-Hyun Choi</i>	413
Volume changes as driving forces to self-induced cracking of Norwegian SCC <i>Tor Arne Hammer, Kåre Johansen and Øyvind Bjøntegaard</i>	423
Autogenous shrinkage of hardened cement binder in self compacting concrete structure <i>Jiří Hošek and Jiří Litoš</i>	433
Effect of stability of self-consolidating concrete on the distribution of steel corrosion characteristics along experimental wall elements <i>Nikola Petrov, Kamal H. Khayat and Arezki Tagnit-Hamou</i>	441
Transport properties and durability of self-compacting concrete <i>Wenzhong Zhu, John Quinn and Peter J. M. Bartos</i>	451
Mechanical and durability aspects of SCC for road structures <i>Ernst Mørtzell and Eva Rodum</i>	459
Proposition of durability test method on concrete attacked by acid rain and test results of super quality concrete <i>Hiroshi Ueda, Yutaka Kimachi, Sakae Ushijima and Keizoh Shyuttoh</i>	469

Evaluation of mechanical properties and durability of super quality concrete
Osamu Makishima, Hitoshi Tanaka, Yuji Itoh, Kenji Komada and Fuminori Satoh **475**

Self-repairing function for cracks of SCC with expansive agent
Akira Hosoda, Tetsuo Shimomura and Toshiharu Kishi **483**

Structural & Mechanical Behaviors

Study on bond characteristics of steel bar of reinforced concrete structure using super quality concrete
Haruhito Yamamoto, Tetsuya Mishima, Makoto Kikuchi and Hiroshi Shima **491**

The effects of the modified composition of SCC on shear and bond behavior
Angelika Schiessl and Konrad Zilch **501**

Self-compacting concrete -time development of material properties and bond behaviour
Gert Köning, Klaus Holschemacher, Frank Dehn and Dirk Weiße **507**

Flexural response and performance of reinforced beams cast with self-compacting concrete
Mohamed Sonebi, Peter J. M. Bartos and Adil K. Tamimi **517**

Improved durability of self-compacting concrete by addition of fibers
Martin F. Bäuml and Folker H. Wittmann **527**

Mixing

Effect of surface moisture of sand on fluidity of fresh mortar
Makoto Hibino, Kazuhiro Morita and Kyuichi Maruyama **537**

Influence of mixing efficiency on the properties of flowable cement pastes
Kazunori Takada, and Joost C. Walraven **545**

Construction & Concrete Products

The quality control method of self-compacting concrete using testing apparatus for self-compactability evaluation <i>Masanori Kubo, Masafumi Nakano, Hiroyuki Aoki, Shigeru Sugano and Masahiro Ouchi</i>	555
Effect of placement and compaction on properties of placing joint <i>Masanori Tsuji, Tekehiro Sawamoto, Yohei Nakajima, Tamotsu Yamada and Yutaka Kimachi</i>	565
Forecasting pumping parameters <i>Denis Kaplan, Thierry Sedran, François de Larrard, Martin Vachon and Giuseppe Marchese</i>	575
Study of self-compacting concrete pressure on formwork <i>Yannick Vanhove, Chafika Djelal, Albert Magnin and Daniel Martin</i>	585
Compatibility between conventional and self-compacting concrete <i>D.W.S. Ho, A.M.M. Sheinn, W.B. Lim and C.T. Tam</i>	595
Self compacting concrete -a step towards improvement of working conditions and rationalisation of construction process. A case study <i>Laurent Neveu, Frédéric Guimbal and Jérôme Dugat</i>	601
Use of SCC to achieve improved concrete surfaces <i>Eivind Heimdal and Alf Egil Mathisen</i>	609
Casting with SCC, execution techniques and curing properties <i>Eivind Heimdal and Alf Egil Mathisen</i>	617
SCC as applied in the Dutch precast concrete industry <i>Wim Bennenk</i>	625
Self-compacting concrete for precast concrete products in Germany <i>Bernhard Hauke</i>	633

Applications

- Construction of rigid foundation of underground diaphragm walls with highly congested reinforcing bar arrangement by using self-compacting concrete **643**
Hirokazu Inoue, Yaeko Takeichi and Takeshi Ohtom
- Application of self-compacting concrete to steel segments of multi-micro shield tunneling method **651**
Mitsuo Tanaka, Kentaro Mori, Takefumi Shindoh and Jun Sakamoto
- Self-compacting concrete used for underground diaphragm walls of the world's largest 200,000 kl inground tanks at Inchon LNG terminal in Korea **661**
Takeshi Ohtomo, Satoru Asaka, Joo-Yeon Kim, Chan-Gyu Park, Seung-Jun Beak, Chel-Su Jung and Youichi Tsutsumi
- Self-compacting concrete in underground and mining applications **671**
Joseph A. Daczko and Stephen H. E. Phillips
- SCC in a rock repository for radioactive waste **681**
Kåre Johansen and Bjørn-Per Kylvit
- Practical experience with the application of self-compacting concrete in Germany **687**
Wolfgang Braumeshuber and Stephan Uebachs
- Development and applications of self-compacting concrete in New Zealand **697**
Michael Khrapko and Van Khanh Bui
- SCC for the rehabilitation of a tunnel in Zurich/Switzerland **707**
Frank Jacobs and Fritz Hunkeler
- Ecological performance of self compacting concrete **715**
Frank Jacobs and Fritz Hunkeler
- Self-compacting concrete -the way to cost effective production of buildings **723**
Marianne Grauers
- Development of a quality control system for self-compacting concrete by using information technology **729**
Daihachi Okai, Takeyoshi Nishizaki, Koji Kawasaki, Fumio Kamada and Minoru Okudate
